

```
25  
26  const clothes=['jacket','t-shirt'];  
27  clothes.length=0;  
28  console.log(clothes[0]);
```

I

Assignment - 2

1. The value of `clothes[0]` is undefined. Because the length of `clothes` is given as zero in 2nd line. If the length is not zero then the output will be `sackit`.

```
55     var array=[25,76,43,86,23];
56     var sum=array.reduce(function(a,b){
57         return a+b;
58     },0);
59     console.log(sum);
60
61     </script>
62
63     </body>
64
65     </html>
```
